3 Read the following text, then answer the questions:

The camel is called the ship of the desert because it has the ability to stay alive in the desert without food and water for six to ten days. Camels are able to stand the loss of about one third of their body liquid without feeling tired. Their noses, ears and eyes are formed in such a way that they are least affected by the dust of the desert. It is a very useful animal for desert travellers and they can carry enormous loads. It is commonly believed that a camel does not need food very regularly, but this is not correct. Because of its amazing body, it can store food and water for many days.

Read the following text, then answer the questions:

Trees are the best gift of nature for us. They make the environment beautiful and clean. Water and sunlight are very important to help trees grow.

Trees can be called the best friend to mankind. People get food from trees. Many animals get their food from leaves, vegetables and fruits grown on trees. They also live near the shadow of trees. We should stop cutting down trees to save nature. They take in sunlight, carbon dioxide and water to produce oxygen which helps to support all forms of life on earth.

Wood from trees is used to make paper, furniture and other goods of daily use. As a result, a large number of trees are cut down every day to cover these needs.

Trees also give us wood and shade. Houses, chairs and toys are made from wood we get from trees. Different kinds of trees provide us with materials for food, clothing and medicines.

Population means the total number of people living in a particular area. The world population right now stands at more than 7.8 billion. China and India are more than 35% of this population. China has the most populated country and India is taking the second position.

It was expected that the world population would reach one billion for the first time in 1804. It was 1927 before it reached two billion, but it took only 33 years to reach three billion in 1960. Now it only takes 12 to 13 years to add one billion people to the world. The food produced every year isn't enough for all people, and it becomes expensive.

Because of that, the prices of useful items increase. It leads to the pollution of water and air. To control the rate of population, different governments have taken a lot of steps around the world.

Time is man's friend. Some people have no respect for it, so they are the enemy of time. The value of time in our lives is important. Our activities show if we realize the value of time or not. People who are careless, people who do not respect dates, people who do things later than expected do not understand the value of time. Some people continue to waste time even after knowing the importance of it. Some people tend to do things in a hurry if they have a lot of time. This is because they always think they have time and put off their work to the next day. Before they leave their work,

Dolphins have been a popular attraction at zoos in <u>recent</u> years. They are more interesting than tigers and lions because they are more active and perform tricks, like circus animals. Although they want to do as the trainer wants, they get bored when they are asked to do the same trick twice. This is one reason that makes scientists believe that they are intelligent. Dolphins are believed that they are the nicest creatures in the sea.

There are stories about dolphins that helped sailors who were going to drown in the

Bees are very good insects. They are always busy doing some task or another. They are not lazy insects. Every one of the bees has something to do. Bees live in hives; they are small holes under the ground. Bees have a big queen which is a very big bee. They give us honey, so they are very useful. We need to care for them as they give us clean and healthy food that is needed by all people all over the world. Their honey is so useful compared to black honey.

There are two kinds of bees, males and females. Male bees are asked to do more difficult tasks. They go around flowers and get food from flowers. But female bees

Children are very dear to us. We all work hard and do our best to make them feel happy. So we must bring them up well to be good people. Bringing up children is a very hard task. There are three stages in bringing up children. The first stage is that just after birth. This stage needs good food and good cleanliness. The second stage is that of early childhood. It is very important and hard at the same time. This second stage needs playing games and making children learn new ways of life. The third stage is that of teenage. This third stage is very dangerous and critical as it needs to be accurate in dealing with children at that time. Any mistake made in any stage means a battle lost in the future.

Pollution is a very dangerous problem. It makes us unable to breathe well. Every day it gets worse. There are many causes of pollution. Smoke that comes out of buses, trains and other kinds of vehicles and fumes that come out of factories cause pollution.

We should try to solve this problem by many ways. For example, cars should use modern engines that don't send out harmful gases or smoke. Next, we must use environment friendly machines that use gases and fumes that don't harm the environment. Finally, more trees and plants must be grown to give us more clean oxygen and help us breathe well. It is the duty of both people and the government to try to stop all causes of pollution.
